Election

Claims 1-10 are generic to a plurality of disclosed patentably distinct species comprising a hydroximic acid derivative of instant formula I, as disclosed throughout the subject specification. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should Applicant traverse on the ground that the species are not patentably distinct, Applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the Examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that to be complete, the reply to this requirement must include an election of the invention to be examined even though the requirement is traversed (37 C FR 1.143).

Any inquiry concerning this communication from the Examiner should be directed to Phyllis Spivack whose telephone number is (703) 308-4703.
